

Hazard Analysis and Critical Control Points System Statement

Texas Citrus Exchange, as required by US law, uses the United States Food and Drug Administration's HACCP system for food processing. As a juice processor, we fall under Title 21 of the Code of Federal Regulations, Part 120. HACCP was implemented at TCX voluntarily prior to the government deadline of January 2002. For any particular or specific questions regarding our HACCP system please contact our Food Safety Coordinator, Maria Gonzalez.

A handwritten signature in blue ink, appearing to read "Justin L. Simpson", is positioned above the printed name and title.

Justin L. Simpson
